- Configure enrichments
- Customize dashboards
- Fulfill professional services hours & additional customizations

### SECOPS TEAM

- Help build and review IR policies, playbooks
- Troubleshoot the SOAR platform and provide support
- Manage and maintain the SOAR platform

## WHAT IS AUTOMATION BY REDLEGG?

RedLegg offers the power of a fully functioning automation platform to our clients to help enhance and further enable their security program. While the MSS service utilizes the XSOAR platform for our investigations and case management, RedLegg's Automation Service offering allows our clients automation capabilities above and beyond the SIEM with further visibility for the operations, management, and executive levels and with the ability to optimize the use and collaboration of existing infrastructure.

Improve  
Investigation  
Quality

Respond To  
Incidents With Speed  
& Scale

Ingest, Search, &  
Query All Security  
Alerts

Optimize  
Existing  
Infrastructure

## A STRATEGIC PLATFORM PERSONALIZED FOR YOUR UNIQUE BUSINESS

Standardize, scale, and accelerate incident response at a fraction of the cost of purchasing and implementing your own SOAR platform.
